

Commissioners:Satellite radio--both XM Satellite and Sirius--is making a difference in the lives of millions of Americans. Please do not impinge on their ability to deliver weather and traffic information to the millions of drivers who will benefit from the information.

Although you have the right to take away the First Amendment rights of broadcasters, you should not.

As well as a Free Speech issue, this is a market issue. Marketplace issues should be decided by the marketplace. They should not be decided by lobbyists's dollars.

Thank you for your consideration.
